SUMMARY

Software Engineer with **3+ years** of experience in ASP.NET Core, Microservices, and gRPC — building scalable backend systems handling **10,000+ daily transactions**. Self-driven transition from engineering into software development with a consistent track record of shipping production-grade systems. Strong in API design, JWT security, Azure DevOps CI/CD, and AI-assisted development. **AZ-900 certified**.

SKILLS

Backend	ASP.NET Core Web API, gRPC, RESTful APIs, JWT Authentication, Middleware, Dependency Injection, ADO.NET, Entity Framework Core
Frontend	Angular 14+, Bootstrap 5, TypeScript, JavaScript (ES6+), HTML5, CSS3
Cloud/DevOps	Azure DevOps, CI/CD Pipelines, Docker, SonarQube, Git
Databases	Microsoft SQL Server, Entity Framework Core, ADO.NET
Other	GitHub Copilot, Azure OpenAI API, Microservices Architecture, Repository Pattern, Agile/Scrum, AZ-900

EXPERIENCE

Software Engineer — .NET Backend & Microservices <i>UST</i>	Mar 2025 – Present <i>Trivandrum, India</i>
– Led migration of New Leaf Pharmacy System from legacy WPF/WCF to gRPC-based microservices (ASP.NET Core), reducing inter-service overhead by 40%. – Replaced DataTable-based data access with strongly typed models via ADO.NET + gRPC, cutting data-layer defects by 30% and improving SonarQube maintainability scores. – Designed and shipped 5+ secure RESTful & gRPC APIs with JWT authentication, supporting 10,000+ daily transactions with zero downtime. – Automated CI/CD via Azure DevOps across Dev, QA, and Production — compressed release cycle from weekly to daily. Improved sprint velocity by 20% using GitHub Copilot.	
Software Engineer — ASP.NET Core Web API <i>Experis IT Private Ltd</i>	Jun 2024 – Feb 2025 <i>Bengaluru, India</i>
– Enhanced 3 enterprise backend services (ASP.NET Core + SQL Server), resolving 20+ critical defects and reducing API response time by 25%. – Implemented JWT authentication and custom middleware for role-based access control, securing endpoints for 5,000+ users.	
Junior Software Engineer — Full Stack .NET + Angular <i>Rolling Rock Software Pvt Ltd</i>	Jan 2023 – May 2024 <i>Bengaluru, India</i>
– Built Angular components and ASP.NET MVC/Web API services, delivering 8+ features across 3 major releases. – Optimised SQL Server stored procedures improving report generation speed by 35%.	
Software Engineer Intern — .NET <i>Palle Technology</i>	Jan 2022 – Dec 2022 <i>India</i>
– Built CRUD web applications using ASP.NET Core, C#, and SQL Server; implemented RESTful APIs with JWT authentication, MVC architecture, and Entity Framework Core.	

PROJECTS

New Leaf — Pharmacy Management System	ASP.NET Core · gRPC · Azure DevOps · Docker · JWT
– Architected phased WCF → gRPC migration with 100% backward compatibility and zero production incidents at go-live. – Contributed to system design including service decomposition, API contracts, and scalability strategy for high-transaction pharmacy workflows.	
AuthX — Multi-Factor Authentication Platform	ASP.NET Core · JWT · SonarQube
– Delivered OTP, biometric, RFID, and offline auth modes; achieved A-grade SonarQube quality on every release across multiple client environments.	
Sales Dashboard	Angular 14+ · ASP.NET Core · SQL Server · github.com/R6108karthik/sales-dashboard-angular-dotnet-sql
– Full-stack analytics dashboard with Angular frontend and ASP.NET Core Web API backend — publicly available on GitHub.	

EDUCATION

Er. Perumal Manimekalai College of Engineering <i>Bachelor of Engineering</i>	2016 – 2020 <i>Tamil Nadu, India</i>
